End-to-End HVAC Solutions and Service

S.A. Comunale offers a complete range of HVAC solutions, including design, installation, equipment replacement, maintenance, and building automation.

With design-build capabilities, we can handle HVAC systems of virtually any size or complexity. Our teams strive to deliver the highest levels of customer service, quality, and safety, while maintaining strict budgets and schedules.

Serving a Wide Variety of Markets

Our team has experience providing HVAC solutions in multiple major markets, spanning from the commercial sector to manufacturing and industrial plants and more. We can even handle the demanding, complex heating and cooling systems found in specialized environments such as clean rooms and treatment facilities.

Support for Your System's Complete Lifecycle

After installation, we offer ongoing service and maintenance aimed at helping ensure the longevity of your system. Our preventive programs are custom tailored to the unique needs of your building, systems, and equipment and include regular scheduled inspections, tests, and checks. When unexpected issues arise, we offer 25/7/365 emergency response. Backed by a fleet of fully equipped service trucks, our technicians are ready to provide prompt and efficiency response.

Comprehensive Expertise

Our HVAC system and equipment expertise includes:

- » Ducted supply, return, and exhaust
- » Unitary heat pumps
- » Variable air volume systems
- » Fan coils
- » Induction systems
- » Energy recovery
- » Direct expansion cooling
- » Steam, hot, and chilled water piping
- » Compressed air
- » Dust and fume collection
- » Hot water and steam boilers
- » Building automation systems
